

Los Alamos National Laboratory:
Science and Engineering for National Security in the 21st Century

Dr. Erik Frederick Shores

Abstract:

An overview of the Los Alamos Weapons Program and brief description of Shores' local organization.

Bio:

Erik F. Shores began his Los Alamos career as a Graduate Research Assistant in 1996. After earning his PhD in Nuclear Engineering from the University of Missouri at Rolla, he joined the Laboratory's "X-Division" in 2002 and worked on various transport applications until 2014 when he joined X-Division's management team. He was Primary Physics Deputy Group Leader for three years and has been the Safety and Surety Group Leader since February 2017. Despite his management duties, he continues to be interested in "transport applications" and runs an occasional MCNP simulation. He is a member of the Los Alamos Mountaineering Club and enjoys trail running.
