Abstract

This seminar will provide an introduction of Sandia National Laboratories (SNL) along with an overview of the nuclear R&D and testing facilities. An understanding will be provided for the Sandia-UNM Inter-Institutional Visitor Agreement (IVA) which provides a legal framework for the University of New Mexico to conduct work at SNL’s nuclear facilities without the exchange of funds. Each organization bears the costs of effort for research and other related work performed at SNL. At the end of the overview, time will be provided for questions and answers related to SNL’s nuclear facilities and the IVA process.
